## By **MRT**

Taking the MRT is one smart way to get to the COMPUTEX TAIPEI exhibition halls. Here's the information you need to take advantage of Taipei's metro line.

### **To TWTC Exhibition Halls**

Simply take the Red Line (Tamsui–Xinyi Line) to Taipei 101/World Trade Center Station.

### **For passengers on the Xindian and Zhonghe lines:**

Go to Taipei Main Station and transfer to the Tamsui–Xinyi Line.

**For passengers on the Wenhu Line:** Go to Daan Station and transfer to the Tamsui–Xinyi Line.

### **To Taipei Nangang Exhibition Center Hall 1**

1. Take the Blue Line (Banqiao–Nangang Line) and get off at Taipei Nangang Exhibition Center Station.
2. Take the Brown Line (Wenshan–Neihu Line) and get off at Taipei Nangang Exhibition Center Station

## By **TAXI**

Taxis are readily available in Taiwan's major cities. In Taipei, the fare is NT\$70 for the first 1.25 km and NT\$5 for every additional 200 meters. An additional NT\$5 is charged for every 80 second of waiting, and a NT\$20 surcharge is added to fares between 11 p.m. and 6 a.m.

A 50 percent addition to the meter charge is needed for cab travel to Taiwan Taoyuan International Airport. It costs around NT\$1,100 to travel from Taiwan Taoyuan International Airport to Taipei City. Most cab drivers don't speak English, so it's a good idea to have hotel personnel write your destination, your hotel's name and address in Chinese, along with the

projected cost of each one-way trip.

To report unreasonable charges or other problems you encounter during your taxi trip, submit your driver's name and license plate along with the time, location and other details of your complaint to the local supervisory unit or the Foreign Affairs Police Department.

# Rebuilding the Tong-an Ships New Media Art Exhibition - Penghu Tour

## Introduction

Acting as the connective hub in the Taiwan Strait throughout history, the Penghu Islands lie contiguous to the southwestern coast of the Taiwan mainland. Historically, people traveled to the islands for political, military, and economic reasons. During the Age of Sail, people were brought in by monsoons and tides as seekers of temporary shelter or permanent settlers, who added the building blocks to the history of this region in their struggles for survival and by so doing slowly molded the islands' rich cultural front exhibited today. Bolstering centuries of maritime activities is the concurrent development of shipbuilding technologies and navigational methods in Fujian, China. The most representative product of this time in the National Palace Museum's collection is documentation on the Tong-an Ship.

During the mid-Qing, pirates arose in the southeastern coast of China. Containing pirate activities on the sea, therefore, became a central focus in governance policies. The imperial court selected its best military officers, dispatched navies, and marshaled civilians to control the coast. Tong-an, the city renowned in the arts of shipbuilding and

navigation, ironically fathered both keepers of naval peace and free-roaming buccaneers. While pirates laid in ambush amidst the archipelago, waiting to seize the next commercial ship, the imperial navy pursued closely, eradicating and placating by turns. Between life and death, honor and infamy, each stanza in the saga of the Tong-an ship sings still from the ashes of history. Penghu was the stage, where heroes cried above the roaring sea. And Penghu became the new home for these people from Tong-an, from a long, long time ago.

The National Palace Museum has in its collection many documents on maritime history that attest to the golden age of Tong-an ship culture. The curatorial team from the museum collaborated closely with the City University of Hong Kong to retell this historical piece in the modern technological medium. Located at the Magong Jinguitou Fortress Cultural Park, this new media art exhibition was designed to support the public opening of this historical site. New technology and ancient artifacts, lying side by side, invite you to participant in different levels of contemplation.
